

City Controller For \$250 Raise For Policemen

Issues Statement Which Declares "Simple Justice" Requires Increase for Patrolmen and Firemen

Mayor's Attitude Changes

Hylan Says He Favors More Pay for All City Employees Getting \$1,800 or Less

The campaign for substantial increases in wages for patrolmen and firemen which is being conducted by the Patrolmen's Benevolent Association and the Uniformed Firemen's Association, scored its biggest success yesterday.

In an official statement Controller Charles L. Craig went on record as favoring an increase of \$250 a year. The Controller's estimate establishes a meeting ground between the increases the men of both services have asked and the figure the Mayor has suggested, which is also the figure which Commissioner Knight has recommended for patrolmen.

The patrolmen and firemen have asked \$1,600, \$1,800 and \$2,000. Mayor's offer, which later became Commissioner Knight's recommendation, was \$1,350, \$1,550 and \$1,800. The City Controller's estimate appeared to support an \$1,450, \$1,650 and \$1,850 increase for patrolmen and firemen respectively.

Patrolmen and firemen are encouraged by this friendly attitude. No official opinion was ventured by the Controller's estimate as to whether the figures suggested by the men, but in official circles close to both departments it was considered likely that the compromise would ultimately be accepted.

"It is gratifying to us," said Joseph Moran, president of the Patrolmen's Benevolent Association, "that the Mayor's estimate is a step in the right direction. It is a \$100 dollar increase over the Mayor's offer, and it is a step in the right direction. It is a \$100 dollar increase over the Mayor's offer, and it is a step in the right direction."

Albert H. Guinness, president of the Uniformed Firemen's Association, said that while the increase named by the Controller was not the one he had in mind, it was a step in the right direction. He said that the men of both services were willing to accept the Controller's estimate as a basis for further negotiations.

The City's WAR

WITH a ring on his finger, which he said had been given him by the Queen of England, but only \$1 in cash in his pocket, Edward Korman, who said he lived at the Hotel Claridge, was arraigned before Magistrate Geismar in the Coney Island Police Court yesterday, charged with having failed to pay a taxicab bill of \$16.29, and had driven Korman about the Bronx district for seven and a half hours.

Korman told the magistrate the Queen gave him the ring for having donated the British lightweight champion. He also said that while locked up in the Sheepshead Bay station he wired President Wilson for assistance.

"Have you ever been in the insane asylum?" interrupted the magistrate. "No," replied Korman, "but nobody is perfect, Your Honor. You yourself are insane."

A spectator in court meanwhile had a conversation with the chauffeur for \$10, which was paid. Thereupon Magistrate Geismar announced that he intended to let Benny Leonard for the night, but that he would not let Korman for the night. He said that Korman was a "bad" man and that he would not let him out of the station.

THE Rev. R. C. Lawson, of 2137 Madison Avenue, will appear Friday in Harlem court to defend Magistrate Levine that the weird vocal and instrumental sounds the neighbors complain originate from the negro Pentecost church, 100 East 131st Street, 100 East 131st Street, 100 East 131st Street.

A necessary part of the congregation is a necessary part of the congregation. Magistrate Levine issued the summons for the colored dominie after Detective Van Damm told him that the singing and shouting was accompanied by an orchestra, including an organ, drums and tambourines.

Firemen, Patrolmen And the 1920 Budget

The Patrolmen's Benevolent Association and the Uniformed Firemen's Association have petitioned the Board of Estimate for these annual salaries:

First grade.....	\$2,000
Second grade.....	1,800
Third grade.....	1,600

Mayor Hylan has suggested the following figures, which he says, will satisfy the men:

First grade.....	\$1,800
Second grade.....	1,600
Third grade.....	1,400

These are the figures also recommended by Commissioner Knight. The Commissioned Firemen has made no recommendation.

Controller Craig recommends the following as a matter of simple justice:

First grade.....	\$1,600
Second grade.....	1,400
Third grade.....	1,200

The present rates are:

First grade.....	\$1,400
Second grade.....	1,200
Third grade.....	1,000

As a spontaneous and voluntary act and because simple justice requires this increase, I make this statement at this time in order that if there is public objection to such a course there may be ample opportunity for it to find expression.

"The police and firemen are entitled to the highest commendation for their manly and thorough American stand against the use of the strike as a means of obtaining redress of grievances. The strike has no place in public employment of any kind whatever, and so far as I am concerned, I shall not be influenced in the slightest degree by any suggestion of limitation of the use of the strike by municipal employees to force the granting of their demands."

Mayor Hylan yesterday issued through his official bureau a statement which depicts a more conciliatory tone than he has recently adopted toward the men of the two services. Previously the Mayor has said that he was not in a position to grant an increase of \$150 would satisfy the men. Recently, also, he gave it as his opinion that Patrolman Moran, head of the P. B. A., was an "egotist."

In the statement issued yesterday no figure was suggested, but the Mayor warmly commends the men, and declares that "no man of my kind of mind can be so foolish as to think that the city can do for them." He says that the city can do for them, but that the city can do for them, but that the city can do for them.

There is another touch of the military service which is entitled to the highest commendation from our citizens. The men of the two services, the police and firemen, are the backbone of the city. They are the men who are the backbone of the city. They are the men who are the backbone of the city.

There is another touch of the military service which is entitled to the highest commendation from our citizens. The men of the two services, the police and firemen, are the backbone of the city. They are the men who are the backbone of the city. They are the men who are the backbone of the city.

Unions' Boycott of N. J. Cars Rumored In Zone Fare Fight

CAMDEN, N. J., Sept. 23.—While residents of this city and surrounding towns continued their boycott against the zone fare system on today cars, it was rumored here today that all unions here had instructed their members to keep off the cars and to keep their families off also.

More than a dozen Camden officials and business men, headed by Mayor C. H. Ellis and Corporation Counsel Blackley, presented the Public Utilities Commission a petition protesting against a continuation of the zone system.

The petition charged that the system was "a complete failure"; that the cars that formerly carried a revenue of \$7,000 to \$8,000 a day now received \$1,500 or less, and urged that the fare be returned to the former level. It also asked that the commission should make plans for the future, which would be made within the next few days.

Camden City Officials Present Petition to Utilities Commission for Restoration of Flat 5-Cent Rate

Whole Town Insured Under Single Policy

Ten Large Concerns Take Out Protection Against Illness, Accident or Death for All of Their Employees

Ten Large Concerns Take Out Protection Against Illness, Accident or Death for All of Their Employees

Adopt New Housing Plan Because of Insanitary Conditions Some of the Old Houses Will Be Burned

All the workers employed by the various industries located at Kingsport, Tenn., have been insured against death, sickness and accident under a single group policy issued by the Metropolitan Life Insurance Company. In all, ten thousand persons employed by ten large concerns are thus protected, and as the population of the town of Kingsport is estimated at about 10,000, almost every family in the community will receive a financial benefit in case of accident, sickness or death.

The policy has been in effect since July 1. According to officials of the insurance company this is the first instance known where a whole community has adopted a standardized plan of insurance. The experiment is attracting the attention of many other municipalities, especially public officials who are interested in community service, and also insurance men.

J. E. Kavanagh, third vice-president of the Metropolitan, said yesterday that the group policy financial benefit to be derived by individuals under the policy was of far less importance than the general good which has resulted from the quickening of the conscience of the whole Kingsport community.

A health center, to which every resident of the city has access, as well as the employees of the particular industries covered by the group policy, has been established. A nurse furnished by the insurance company is in charge. Meanwhile the officials of Kingsport have selected a public health official, drawing salary from the municipality, to look after the sanitary conditions of the community.

Among other things, an attractive housing plan has been adopted and will be carried out as expeditiously as building conditions will permit. After making a careful survey, the nurse in charge of the health center found a large number of houses in the town that she regarded as insanitary and that should be burned. All of Kingsport, as well as a large delegation of "movie" picture men, have been invited to watch the burning.

The insurance company, Mr. Kavanagh explained, has become a part of the town of Kingsport, and its suggestions as to improvements are being accepted. The health of the community is being improved by the group policy, and the health of the community is being improved by the group policy.

Board of Aldermen To Investigate Pay Of City Employees

Continued unrest among employees of the city because of their inability to stretch their pay to cover the increased cost of living drove the Board of Aldermen to take preliminary action yesterday. At the suggestion of President Moran, a committee of eight was appointed and ordered to hold hearings on the efforts of city employees to live on their present wages.

In the near future further emphasis was given to the appeal of the Union of Technical Men, composed of city employees, for a \$500 a year raise in pay, by the American Association of Engineers. This body has a detailed report to the Board of Estimate yesterday, and its investigation of present rates led it to recommend a varying wage increase for technical men, ranging from 72 percent for those receiving less than \$5,000 a year, to 12 percent for those receiving more than \$5,000 a year. If such wage increases are not possible, at this time, the association suggests as an alternative the granting of a \$500 increase in pay to each member of the union.

Some technical men get as low as \$800 a year. The average wage of all union members is \$828 a year. Under the schedule submitted by the association, the minimum monthly wage would be \$100, and the maximum \$1,000. The secretary of the association, would be \$1,000 below the monthly minimum in Chicago.

The Central Council of City Employees, which was formed last Thursday night and still exists despite the displeasure of many in authority, announced yesterday that employees of the city, who are not members of the union, will be asked to join the union. The union will be asked to join the union.

Committee Is Appointed To Hold Inquiry; Engineers Urge Increase in Salaries of All Technical Men

Continued unrest among employees of the city because of their inability to stretch their pay to cover the increased cost of living drove the Board of Aldermen to take preliminary action yesterday. At the suggestion of President Moran, a committee of eight was appointed and ordered to hold hearings on the efforts of city employees to live on their present wages.

Electrical Exposition Will Be Opened To-night

The Grand Central Palace, which housed thousands of wounded soldiers throughout the war, will open to its original purpose to-night and become the home of a more elaborate and diversified show than ever before.

All that is worth while in the art and science of electricity will be shown. New developments and inventions will be displayed, together with the adoption of peace-time uses of devices originated for military purposes.

The amount of electricity generated in the United States alone, if used in one gigantic storage lamp, would almost equal the sun itself in brilliance. In all, more than 17,000,000,000 kilowatt hours of electricity are produced annually.

Of special interest to New Yorkers in this day of secret scarcity is the model apartment, in which almost all of the processes of housekeeping are performed by electric contrivances.

The exposition will be open morning, afternoon and evening, until October 4.

JOHN WANAMAKER

In this business are the things that complete the living roots of a growing enterprise

JOHN WANAMAKER
Formerly A. T. Stewart & Co.
Broadway at Ninth, New York.
Store Hours, 9 to 5:30

Good morning!
This is September 24!
The weather today will probably be fair.

Taking it for granted, Mr. Young Man

of the City or Country town, that the war has cleared up the way for you to embark in business, it is a pleasure to be among the first to reach out a hand to you and wish you success.

Perhaps you will not think it amiss with this sign of good will to venture a few friendly suggestions that only age and experience justify.

Do not presume that your name on a sign is worth anything, even if you bear the name of a worthy father or have inherited a business of his making. Your knowledge, integrity and ability must be proven and appear before you claim credit and position for what was done by your predecessors.

Do not fail to count the real value of your time and money. Count the value of quarters as well as dollars. Stephen Girard's maxim was, "Take care of the cents and the dollars will take care of themselves."

John Jacob Astor stated that his ruling idea in his life was, "My actions must make my life."

We are trying to make our own business to be a fair sample of the things that complete the living roots of a growing enterprise.

(Signed)
John Wanamaker
Sept. 24, 1919.

The exposition will be open morning, afternoon and evening, until October 4.

Model Apartment Exhibited and War Devices Adopted to Peace-Time Needs

The Grand Central Palace, which housed thousands of wounded soldiers throughout the war, will open to its original purpose to-night and become the home of a more elaborate and diversified show than ever before.

All that is worth while in the art and science of electricity will be shown. New developments and inventions will be displayed, together with the adoption of peace-time uses of devices originated for military purposes.

The amount of electricity generated in the United States alone, if used in one gigantic storage lamp, would almost equal the sun itself in brilliance. In all, more than 17,000,000,000 kilowatt hours of electricity are produced annually.

Of special interest to New Yorkers in this day of secret scarcity is the model apartment, in which almost all of the processes of housekeeping are performed by electric contrivances.

The exposition will be open morning, afternoon and evening, until October 4.

JOHN WANAMAKER

In this business are the things that complete the living roots of a growing enterprise

JOHN WANAMAKER
Formerly A. T. Stewart & Co.
Broadway at Ninth, New York.
Store Hours, 9 to 5:30

Good morning!
This is September 24!
The weather today will probably be fair.

Taking it for granted, Mr. Young Man

of the City or Country town, that the war has cleared up the way for you to embark in business, it is a pleasure to be among the first to reach out a hand to you and wish you success.

Perhaps you will not think it amiss with this sign of good will to venture a few friendly suggestions that only age and experience justify.

Do not presume that your name on a sign is worth anything, even if you bear the name of a worthy father or have inherited a business of his making. Your knowledge, integrity and ability must be proven and appear before you claim credit and position for what was done by your predecessors.

Do not fail to count the real value of your time and money. Count the value of quarters as well as dollars. Stephen Girard's maxim was, "Take care of the cents and the dollars will take care of themselves."

John Jacob Astor stated that his ruling idea in his life was, "My actions must make my life."

We are trying to make our own business to be a fair sample of the things that complete the living roots of a growing enterprise.

(Signed)
John Wanamaker
Sept. 24, 1919.
